

NAL12D8 File Layout Changes

Starting with the 2005 tax year, field 16 (Filler) is used as an indicator of value change due to the effects of a 2005 named storm. A value of "3" indicates that the value has decreased due to storm activity. A value of "4" indicates that the value has increased due to storm damage remediation.

Starting with the 2005 tax year, fields 25 (O.R. Book) and 26 (O.R. Page) contain the filing instrument number instead of the O.R. Book and Page. The last nine digits of the instrument number are stored. The first four digits (indicating the year) are omitted.
